

## **eGistics Unveils CloudDocs, A Cloud-Based e-document Storage Management Solution for Businesses of Any Size, In Any Vertical**

### **J.D. Byrider Deploys CloudDocs for Enterprise Document Storage**

DALLAS--(May 9, 2011)--[eGistics](#) today unveiled CloudDocs, a feature-rich cloud-based e-document storage management solution for businesses of any size, in any vertical market.

“CloudDocs makes it easy for businesses to capture and index documents”

CloudDocs is designed to manage structured, electronic documents for departmental and enterprise business processes, such as accounts payable, branch management, loan origination, and more. And, unlike generic storage solutions, CloudDocs completely eliminates the burden of determining where to store documents -- in terms of files and folders. CloudDocs provides nearly instantaneous retrieval of documents in order to help staff perform their jobs.

CloudDocs includes tools designed to make capturing, storing, managing, securing and finding business documents easy and fast, no matter how long they need to be retained. These capabilities include: scan-to-web; bar code recognition; data integration with legacy systems; powerful document search functionality; the ability to view retrieved documents individually or as part of a group; digital annotation capabilities for capturing important information about a document or key actions taken; flexible document export functionality. CloudDocs also is highly secure. It provides administrative functions for managing group and user security and privileges, and it is SAS 70 and PCI-certified and HIPAA compliant.

“CloudDocs makes it easy for businesses to capture and index documents,” said eGistics Senior Vice President of Product Management Amer Khan. “For instance, CloudDocs can recognize bar codes, which many businesses use to organize packets of documents. Documents can even be loaded into CloudDocs and indexed later. And once documents are loaded into CloudDocs, users don’t have to worry about where they are located; with a simple command, CloudDocs retrieves them instantly.”

J.D. Byrider, the nation's leading used car and finance franchise company, is deploying CloudDocs for its enterprise document storage. J.D. Byrider initially will use CloudDocs to scan and manage contracts received at its 13 company-owned locations, and to archive human resources documents now stored at its corporate headquarters. Authorized users will be able to search and retrieve archived documents with rapid retrieval via a high-speed Internet connection. J.D. Byrider's more than 110 additional franchise locations also will be able to license CloudDocs to store contracts and other documents.

CloudDocs is replacing J.D. Byrider's on-premise legacy document management system. In addition to lowering J.D. Byrider's costs to store documents, CloudDocs will streamline contract processing by enabling J.D. Byrider's company-owned locations to scan contracts at the point of presentment, facilitating collaboration among staff, and speeding access to archived documents. CloudDocs will integrate with the J.D. Byrider Discover System in order to automate document indexing and speed the document load process. J.D. Byrider also expects CloudDocs to help improve its compliance and information security measures.

"CloudDocs demonstrates the power of the cloud for e-document storage," said Randy Davis, vice president of sales and marketing operations at eGistics. "The combination of relentless cost pressures and increasing customer service demands will continue to drive interest in cloud-based e-document storage solutions from businesses of all sizes, in all vertical markets."

CloudDocs will be generally available in May.

### **About J.D. Byrider**

In business for 22 years, J.D. Byrider is the nation's leading used car sales and dealer carried finance franchise company. The company was founded to serve consumers with special auto financing needs and to ensure that they receive the same quality service in every J.D. Byrider dealership. With nearly 900,000 customers matched to quality, affordable vehicles, the company continues its focus on providing better cars, affordable payments, and better car care and customer satisfaction. Current Customer Satisfaction Ratings are 95% for Sales and 90% for service, numbers that are among the highest in the industry. See [www.JDBFacts.com](http://www.JDBFacts.com) for more information. Headquartered in Carmel, IN, J.D. Byrider maintains 127 franchisee and company-owned dealerships in 29 states. Visit [www.jdbyrider.com](http://www.jdbyrider.com) to learn more about the company.
